EXPERIENCE

2023 - 2024

- **Intern**
TTCS Global
 - Assisted in the design, development and testing of web applications under the supervision of senior developers.
 - Collaborated with software team to debug code, resolve performance issues and implement new features.
 - Participated in daily stand-ups and sprint reviews using Agile/Scrum development methodologies.
 - Gained practical experience in software development lifecycle, teamwork and problem-solving in real world environment.

2024 - 2025

- **Junior Developer**
TTCS Global
 - Contributed to the development and maintenance of software applications using C# and .NET.
 - Implemented new features, fixed bugs, and optimized code for better performance and scalability.
 - Collaborated with senior developers in designing and testing application components following Agile/Scrum practices.
 - Strengthened technical and teamwork skills by working on live client or internal projects in a fast-paced environment.
 - Technologies used include Git, Javascript, SQL, Docker.

2025 - Present

- **Full Stack Developer**
TTCS Global
 - Designed, developed, and maintained full-stack web applications using C#, ASP.NET, SQL Server, ensuring efficient and secure data handling.
 - Built responsive user interfaces with HTML, CSS, Javascript and integrated them seamlessly with backend APIs.
 - Designed and implemented RESTful APIs to support dynamic, data driven web applications.
 - Collaborated with other senior developers to analyze requirements, design system architecture, and implement scalable solutions.
 - Participated in software development lifecycle (SDLC), including coding, testing, debugging, and deployment.
 - Documented technical processes and contributed to deployment guides for future maintenance and scalability.

EDUCATION

2025

- **Midlands State University**
Bachelor Degree Honors in Data Science and Informatics

SKILLS

- C#
- Python
- SQL & NoSQL
- CI/CD
- Problem solving
- Agile Development
- Time management
